DETAILED ACTION

Election/Restriction

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Fig. 1, drawn to a screw operated piston for conveying the product;

Fig. 2, drawn to an aerosol can;

Figs. 5a-e, drawn to a deformable internal bag surrounded by gas propellant.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 19-31, 33-39 and 41 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Application/Control Number: 09/913,339 Page 3

Art Unit: 3751

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the

inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently

named inventors is no longer an inventor of at least one claim remaining in the application. Any

amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee

required under 37 CFR 1.17(I).

Conclusion

3. The Examiner is advising attorneys to FAX any response due to Office actions. The U. S.

Patent and Trademark Office (USPTO) is experiencing major delays in matching up papers that were

mailed. Due to the Anthrax issue, any mail sent to the USPTO is automatically sent to an irradiation

center in Virginia. It has been found that the irradiation process makes papers too brittle to handle.

Therefore, the irradiation center has to further copy each paper. The originally filed irradiated papers

are then placed in a sealed envelope and put in the associated file. After this irradiation process, the

"papers" are then sent to the Office where they are matched with the file. This entire procedure

causes months in delays due to the quantity of mailed received. Therefore, it is suggested that any

response be sent by FAX especially if a time limit is critical. The FAX number for the technical

center where this file is located is given in the paragraph below.

4. Any inquiry concerning this communication from the examiner should be directed to

Examiner Kathleen J. Prunner whose telephone number is 703-306-9044. The examiner can usually

be reached Monday through Friday from 5:30 AM to 2:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Gregory L. Huson, can be reached on 703-308-2580. The FAX phone number for the organization

where this application is assigned is 703-308-7766.

Art Unit: 3751

Any inquiry of a general nature or relating to the status of this application should be directed to the receptionist whose telephone number is 703-308-0861.
